

I hereby certify that this document and associated code has been generated by me with the highest academic integrity, Mirudhula.

1. I discussed question numbers 2c, 5c, and 9c with Vatsal.
2. I used chatgpt to understand the divergence in different directions for question number 5c and numerical plotting in question number 7d, and to learn more about what Hankel functions were.

I have also attached the pdf of scanned copies of my assignment questions, except for 7th, for which I have attached a MATLAB file in a zip file.
